

Scawd Law Wind Farm

The developers of the proposed Scawd Law Wind Farm project will be holding a drop-in session in the Public Hall on **Wednesday 25th January between 1.30pm and 7.00pm.**

A Planning Application has been submitted for erection of 8 turbines on hills to the North of Walkerburn. Each turbine will be 180 metres in height.

This is an important project and there are both positive and negative aspects for residents to consider. It is important that local residents clearly understand the impact of what is planned and representatives will be at the Hall to answer any questions that arise.

Please take time to make the most of this opportunity.
